

Building sentences

1. Cut out the words below.
2. Put them in two piles. The words in **bold** should go in one pile (these are **verbs**, or 'doing' words). The underlined words should go in a different pile (these are **subjects** - the person or thing doing the verb).
3. Pick a word from each pile and make your own sentence. The sentences you make can be long or short. All sentences need a verb and a subject.
