

Find the difference

Show the differences on the number line on the right.

- The difference between 12 and 8.
- The difference between 29 and 6.
- The difference between 19 and 7.
- The difference between 15 and 6.
- The difference between 22 and 15.
- The difference between 27 and 8.

There are a number of different ways of finding the difference. You could use 'counting on' or 'counting back'. You could first move in tens and then remaining part or move to the nearest 10, then in tens and then the remaining part.
