

## **Metres and centimetres 2**

Now put the lengths in the **correct order of size, from smallest to largest.** First cut up the lengths below and move them around to get them in the correct order:

12.5 m
0.04 m
0.4 m
0.85 m
125 m
0.13 m
85 m
8.5 m
1.3 m
1.03 m
12.05 m
4 m

## **Metres and centimetres 2**

When you've ordered the lengths, write them into the blank table **in the correct order, from smallest to largest.** 

	length
smallest
