

Addition activities

- A. When do you add numbers or values in everyday life or work? Talk about this with others and note the answers.
- B. Sort the following into **sometimes**, **always**, **never** categories. Try out with examples to check and / or justify your answers. Work with someone else if you can.

1. Adding two or more odd numbers together gives an odd number

2. Adding two or more even numbers together gives an even number

3. Adding two whole numbers, each with 3 digits, gives another 3 digit number

4. Adding two whole numbers, each with 3 digits, gives a 4 digit number

5. Adding three whole numbers, each with 2 digits, gives a 4 digit number

6. Adding two numbers rounded to the nearest 10 gives the answer rounded to the nearest 10
