

## Splitting up numbers

Use the **splitting up** numbers method to **add** these amounts.

$70 + 69 = \underline{\hspace{10em}}$

$77 + 53 = \underline{\hspace{10em}}$

$39 + 50 = \underline{\hspace{10em}}$

$81 + 35 = \underline{\hspace{10em}}$

$49 + 55 = \underline{\hspace{10em}}$

You can try the same calculations using the following methods. Which do you prefer?

- **Doubling** (for addition)
- **Rounding**

Now check your answers with those on the answer sheet.
