

Interpreting division problems

Decide whether the answers to the following problems should be rounded up, rounded down or left exact:

1. A car uses 5 litres of fuel to travel 64 miles. How many miles per litre?

2. The cost of a meal for 5 people is £43. Each person pays the same. What does each person pay?

3. An 82-litre bath takes 5 minutes to empty. How many litres per minute?

4. A minibus takes 20 people. How many buses are needed for 65 people?

5. A baker sells bread rolls in packs of 4. How many packs can be filled with 70 bread rolls?

6. A café takes £80 in tips. There are 3 waitresses and each gets the same tip. How much does each get?
