

## Some reminders for written division

When you are dividing numbers you need to decide whether to use a mental method (doing calculations in your head) or a written method (writing the numbers down).

### A reminder about place value

Have a look at the number **623**.

6	0	0	← 6 hundreds
	2	0	← 2 tens
		3	← 3 units
<hr/>			
6	2	3	

- **6** is the hundreds digit
- **2** is the tens digit
- **3** is the units digit

### Division sums

$$\begin{array}{r} 4 \overline{)92} \\ 92 \\ \hline \end{array} \quad \frac{92}{4}$$
$$92 \div 4$$

A division sum can be written in lots of different ways.

These all mean 92 **divided by** 4.
