

Solving problems

Use what these people say to answer the questions on page 2.

Each person on page 1 has worked out a problem. Use the words they say to work out whether they had to **add**, **subtract** or **multiply**. Can you write each of the problems as a sum? The first has been done for you.

What did Mark do to work out how many things he bought at the garden centre?	<p>add</p> $2 + 3 = 5$
--	------------------------

What can Della do to work out how many napkins she has?	
---	--

What can Shobna do to work out how many pencils she has left?	
---	--

What can Sam do to work out how long the whole journey took?	
--	--

How can Jeff work out how many tablets he needs in a day?	
---	--

How can Jill work out how much of the collection is left for the gift?	
--	--
