

## Problem solving with addition and subtraction: money 2

Complete the tables below:

1.

<b>Step 1</b> <b>Read and understand the problem.</b>	You can save 50% off the cost of a cinema ticket if you buy it 2 weeks in advance. The full ticket price is £7. How much would it cost to buy 3 tickets in advance?
<b>Step 2</b> <b>Work out what calculations you need to do.</b>	
<b>Step 3</b> <b>Carry out the calculations and answer the problem.</b>	
<b>Step 4</b> <b>Check your answer works.</b>	

2.

<b>Step 1</b> <b>Read and understand the problem.</b>	A coach ticket usually costs £15 but you managed to get a special saver ticket for half price. How much change will you get from £10?
<b>Step 2</b> <b>Work out what calculations you need to do.</b>	
<b>Step 3</b> <b>Carry out the calculations and answer the problem.</b>	
<b>Step 4</b> <b>Check your answer works.</b>
