

Finding ten percent

Look through this menu:

All starters £3.00
All main courses £5.00
All puddings £2.00
10% service charge added to all bills.

Work out what the 10% service charge will be for the following meals:

1. A starter and a main course.
2. A main and a pudding.
3. A starter, a main and a pudding.

Now work out the bills for these meals and then work out the 10% service charge.

4. Two people both having starters and main course.
5. Five people all having starters, main and pudding.
6. Three people all having main and pudding.
7. Four people. Two have starter, main and pudding. Two have just main and pudding.
8. Five people. They share three starters, have a main course each and there are two puddings.
9. Ten people. Starters and main for everyone and six puddings.
10. Six people. Three starters, five have main course and all have pudding.

Now check your answers with the answer sheet.
