

Spotting improper fractions

An improper fraction, or **top-heavy fraction**, is one that has a top number that's larger than the bottom number. They're called improper fractions because they all larger than 1.

Put a cross in any box that's next to an improper, top-heavy, fraction.

1. $\frac{2}{3}$

2. $\frac{9}{13}$

3. $\frac{7}{6}$

4. $\frac{11}{12}$

5. $\frac{6}{5}$

6. $\frac{15}{13}$

7. $\frac{15}{20}$

8. $\frac{4}{3}$

9. $\frac{3}{4}$

10. $\frac{24}{12}$
