

## Percentages of amounts - answers

The statements below have been put in the correct order under the appropriate problems.

### 1. Work out 50% of £120.

50% is the same as  $\frac{1}{2}$ .

$\frac{1}{2}$  of something means divide by 2.

120 divided by 2 is 60.

**So 50% of £120 is £60.**

### 2. Work out 25% of 60 kg.

25% is the same as  $\frac{1}{4}$ .

$\frac{1}{4}$  of something means divide by 4.

60 divided by 4 is 15.

**So 25% of 60 kg is 15 kg.**

### 3. Work out 20% of 80 miles.

20% is the same as  $\frac{1}{5}$ .

$\frac{1}{5}$  of something means divide by 5.

80 divided by 5 is 16.

**So 20% of 80 miles is 16 miles.**
