

Extracting information from pictograms - answers

Pictogram showing how many people visited a local library on different days of a week

Answers:

1. How many people visited on Thursday? **50** (5×10)
2. On which day did most people visit? **Saturday** (had the most symbols)
3. How many people visited on Friday? **15** ($10 + 5$)
4. What is the difference between the number of visitors on Tuesday and Wednesday? **10** (Wednesday had 1 more symbol worth 10 people. Or calculate by subtraction: $30 - 20$)
5. How many people visited the library altogether in the week shown? **220** ($35 + 20 + 30 + 50 + 15 + 70 = 220$) or ($21 \times 10 + 5 + 5 = 220$)
