

## Interpreting a pictogram - answers

### Suggested answer

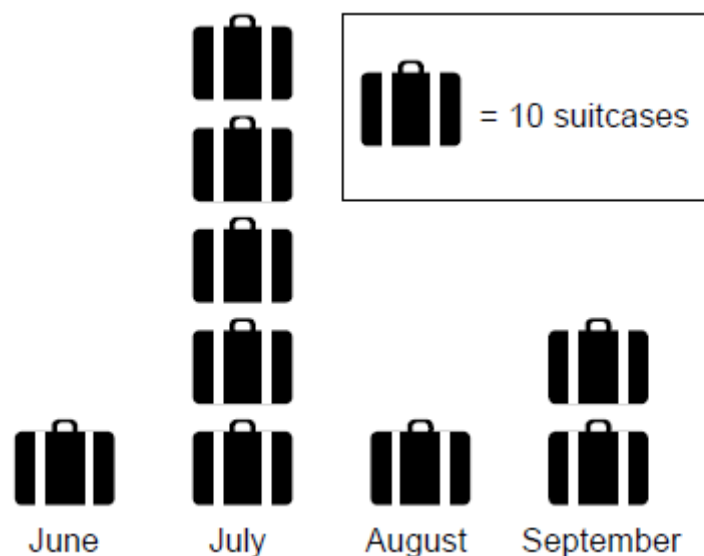

You should have decided on a **title** and **labelled** each column.

You should also have added a **key** to explain what each picture represents.

Check to make sure that your ideas are right by showing your work to someone who can help.

Here is an example of a possible answer, yours will be different:

Lost luggage recorded at Toxton Airport June - September:

The pictogram now makes sense because it has:

- a **suitable title** - 'Lost luggage recorded at Toxton Airport June - September'
- **labelled columns** - June, July, August and September
- a **key** - to show that in this case each picture represents 10 lost suitcases
