

Reading a bar chart: eye colours - answers

This bar chart shows the eye colours of a group of children.

1. How many children have brown eyes? **3 children** have brown eyes.
2. Which eye colour do most children have? The bar for **blue eyes** is the highest so this is the most common eye colour.
3. How many children are here in total? There are **29** children here in total. Add up the amounts that each bar represents to work out the total number.
