

Activity 3: Draw a line to the correct definition.

Evaporation

Water vapour (gas) cools and turns into water (liquid).

Transpiration

Rainwater that's not absorbed by the soil runs over the land and collects in lakes or rivers, which take it back to the sea.

Condensation

Water that falls from clouds and reaches the ground.

Precipitation

The evaporation of water from a plant's leaves.

Run-off and collection

A change in state where water (liquid) turns into water vapour (gas).
