

Chatbots can help a human like you  
But being your friend is what they can't do  
When you need facts, to help with a task  
They can find information incredibly fast

AI learns, but it has no brain  
So it can't feel joy, and it can't feel pain

AI, AI, (It's a tool, not a human)  
Ai, AI, (Let there be no confusion)  
AI, AI, (Real emotions don't affect it)  
And it gets stuff wrong so double check it!

If you feel sad, don't turn to AI  
It can't sympathise or understand why  
Talk to a trusted adult or mate  
But for fast facts chatbots can be great!

AI, AI, (It's a tool, not a human)  
Ai, AI, (Let there be no confusion)  
AI, AI, (Real emotions don't affect it)  
And it gets stuff wrong so double check it!
