

### Investigating biodiversity

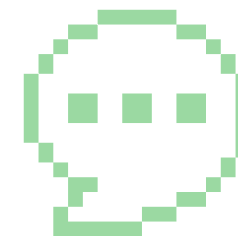

Classroom recording sheet for use after fieldwork when investigating biodiversity in the school playground

Names

--	--	--	--

**Remember**

1. After you have conducted your biodiversity survey using your BBC micro:bit, touch the micro:bit logo sensor on the front to view your totals on the LED screen.
2. Your micro:bit will display an animal symbol, followed by the number of different animal species you found. Then it will display a plant symbol, followed by the number of different plant species you found.
3. Record your totals on this worksheet.

Location		My number	My class average
Playground	Number of animal species logged		
	Number of plant species logged
