

## Add and subtract times

### Example

What is 3 hours and 40 minutes add to 5 hours and 10 minutes? Use method 1 from the **Working with hours and minutes** factsheet.

First add together the hours and minutes separately:

$3 + 5 = 8$  hours,  $40 + 10 = 50$  minutes.

Then add these together to get the answer, 8 hours and 50 minutes.

**Try these questions then see the answer sheet to check your answers.**

Remember there are 60 minutes in 1 hour.

1. What is 2 hours 15 minutes added to 4 hours 15 minutes? \_\_\_\_\_
2. What is 5 hours 5 minutes subtracted from 7 hours 20 minutes? \_\_\_\_\_
3. What is 3 hours 25 minutes added to 6 hours 35 minutes? \_\_\_\_\_
4. What is 6 hours 25 minutes subtracted from 8 hours 40 minutes? \_\_\_\_\_
5. What is 6 hours 40 minutes added to 3 hours 35 minutes? \_\_\_\_\_
6. What is 5 hours 40 minutes subtracted from 10 hours 30 minutes? \_\_\_\_\_
7. What is 3 hours 55 minutes added to 2 hours 45 minutes? \_\_\_\_\_
8. What is 9 hours 55 minutes subtracted from 15 hours 45 minutes? \_\_\_\_\_

Now check your answers with those on the answer sheet. How did you do?
