

## **Comparing shapes**

Here are some different shapes and objects. Match the 2D shape to a 3D version and discuss your reasons. There are more on page 2.

On page 1 the 2D shapes were matched to their 3D version. On this page, you will look at the faces of the 3D shapes. For example, all the faces of a cube are **square**.

Find the 2D shapes that appear in the 3D shapes below. Some use more than one 2D shape.
