

# Designed for every learner

Co-designed with teachers and therapists.

For Educators, SEND teams, Music Teachers  
& Therapists, and Partners

---

See Cosmo in action →

# Hardware & Software. One connected learning system.

Plug-and-play, inclusive by design, designed to support diverse learning needs at scale.

# What is Cosmo?

Cosmo is a holistic, play-centred learning system that supports diverse needs at scale - building cognitive, motor, social and emotional skills in one unified experience.

## Why we exist?

### Our Purpose:

Empower every learner to engage, grow and develop skills.

### Our Vision:

A world where every learner reaches their unique potential.

### Our Mission:

Create inclusive hardware and software co-designed with teachers and therapists.

## Who we serve?

Mainstream and SEN schools, SEND educators, therapists, music teachers, and global partners.

## Why choose Cosmo?

### Holistic skill development

---

One system that nurtures cognitive, motor, social and emotional growth.

### Play at the centre

---

Interactive, multi-sensory activities that boost engagement and keep classrooms buzzing.

### Plug-and-play, at scale

---

Flexible hardware + software that adapts across SEND, mainstream, music and STEM settings — no need to be tech-savvy.

### Proven impact

---

Evidence-based, co-designed with teachers and therapists, with measurable learner outcomes built in.

# COSMO Dot

## The smart controller (set of 8)

Multi-sensory, Bluetooth-enabled controller that brings learning to life.

### Two ways to use:

#### 01: Standalone

Use as an accessibility switch with the Cosmo Switch App or connect with other learning devices, apps, and ACC tools.

#### 02: In the ecosystem

Pair with the Cosmo iPad App to access evidence-based learner activities supporting cognitive, motor, social, and emotional development.

**Inclusive by design**

**Adjustable touch sensitivity**

**Plug-and-play simplicity**

**Multi-colour LEDs**

**Durable**

**Long-life battery**

COSMO

# Ability

SEND activity set

Customisable activities supporting cognitive, motor, social, and emotional development.

---

  - **Adapt in taps:** difficulty, colours, distractions and more
  - Solo or group modes to boost **inclusion** and **engagement**
  - **Built-in reporting** to track learner progress over time
- 

Perfect for: **SEND classrooms, therapy sessions**

COSMO

# Music

Music education & therapy

Rhythm and sound activities for self-expression, coordination, and musical theory.

---

- Learn melody, harmony, rhythm with ready-made or custom tracks
  - Integrates with **GarageBand, ThumbJam** and other MIDI platforms
  - Solo or group sessions; supports music therapy goals (**motor skills, regulation, confidence**)
- 

Perfect for: **Music teachers & therapists (EYFS/SEND)**

## Testimonials:

“I can’t say enough positive things about it. It’s really helping the students to develop their turn taking skills, to work together, and to have the opportunity to give directions to the rest of the class.”

**Meighan Curren**

Teacher at Cricket Green School

“Cosmo is so versatile and can be used with any age and ability across our school. The range of different activities really makes it accessible for so many of our students.”

**Susan Cumbers**

Business Manager at Corbets Tey School

“Really effective for music-making in special education settings. Supports both musical and non-musical development. The visual aspects are really compelling and very easy to set up.”

**Ben Sellers**

Music Educator, Transformance Music

“As a multidisciplinary team, we all love using cosmo to make our therapy sessions as fun and engaging as possible. One of the first questions that gets asked each morning is who has all the cosmo dots because no one wants to do their session without them!”

**Kids Therapy Works**

# One system. Every learner.

Play-centred, inclusive learning co-designed with teachers and therapists.
