

Scientist Observation Record: Climate Change in the Arctic

Imagine that you are a research scientist studying the impact of climate change on the Arctic region and the species that live there. Record your observations below using facts and knowledge from your research.

Observation	Species Affected	Reason
Example: Lemming population has significantly reduced	Lemmings Arctic foxes (predator of lemmings) Snowy owls (predator of lemmings)	Reduced snow cover over the Arctic tundra has exposed lemmings to cold weather and predators

What actions must be taken to bring about change?

- _____
- _____
- _____
